DIAGNOSED WITH MODERATE-TO-SEVERE PLAQUE PSORIASIS

2016

STARTED ILUMYA® (TILDRAKIZUMAB) 100 MG/ML

JANUARY 2020

## Psoriasis Journey

Tommy worked outdoors for most of his career, so he suspected his initial plaques were from strenuous work rather than a symptom of moderate-to-severe plaque psoriasis.

Tommy was diagnosed with moderate-to-severe plaque psoriasis in 2016 after his plaques spread to his arms, elbows, and knees.

His plaques were uncomfortable. He found them to be an inconvenience in his daily activities as he couldn't keep up with his daughter and grandchildren's active lifestyles.

*"I thought I could just power through it by using topicals ... But there comes a point when you have to admit you need to take the next step."*

## Finding ILUMYA®

Tommy tried a few other treatments over the years but did not find long-lasting skin clearance. His dermatologist then recommended ILUMYA®.

*"I'm very satisfied with ILUMYA®. It is my treatment of choice for my moderate-to-severe plaque psoriasis."*

With a busy family schedule and his own business, it was important for Tommy to find a treatment with a dosing schedule that worked for his lifestyle. With only four doses a year after two starter doses, Tommy knew ILUMYA® doses could easily be scheduled on his calendar.

Soon after receiving his first two doses, Tommy's plaques began to clear up. Now Tommy is experiencing almost completely clear skin.

ILUMYA® (tildrakizumab-asmn) is a prescription medicine used to treat adults with moderate-to-severe plaque psoriasis who may benefit from taking injections, pills (systemic therapy), or phototherapy. The most common ( $\geq 1\%$ ) adverse reactions for ILUMYA® compared to placebo are upper respiratory infections (14% vs 12%), injection site reactions (3% vs 2%), and diarrhea (2% vs 1%). These are not all of the possible side effects of ILUMYA®. Call your doctor for medical advice.

## Road to Lasting Skin Clearance

Family is at the center of Tommy's life. Now that his skin is free from plaques and flakes, Tommy can focus on spending time with his children and grandchildren rather than on his painful plaques.

Tommy has noticed that even with life's stressors, like moving, he almost never experiences a flare up.

After experiencing symptoms of moderate-to-severe plaque psoriasis for decades, Tommy is excited about finding a long-lasting treatment. In fact, nine out of ten people who achieved clear or almost clear skin after one year were still seeing results five years later.

People living with moderate-to-severe psoriasis should talk to their doctor to determine what treatment option may be right for them. For more information about ILUMYA®, and a downloadable doctor discussion guide, visit [ILUMYA.com/talk-with-your-dermatologist](https://www.sunpharma.com/illumya/talk-with-your-dermatologist).

ILUMYA® IS IN IT FOR THE LONG HAUL WITH ME

With ILUMYA®, most people with moderate-to-severe plaque psoriasis can achieve clear or almost clear skin in as little as 12 weeks, and 5 years into treatment, it's still going strong.

Here are some reasons to ask your doctor about ILUMYA®:

### LONG-LASTING RESULTS

9 out of 10 people who achieved clear or almost clear skin after 1 year were still seeing results 5 years later

### DOSING AROUND YOUR SCHEDULE

4 doses a year after 2 starter doses

### WORKS FROM THE INSIDE

ILUMYA® works with the body to balance an overactive immune system, addressing symptoms at the source

### AFFORDABLE TREATMENT

Eligible patients may pay just \$5 per dose of ILUMYA®\*

\* \$16,000 maximum program benefit per calendar year. Not valid for patients without commercial insurance coverage or if prescription is paid for by any state or federally funded healthcare program, including but not limited to Medicare, Medicaid, VA, DOD, or TRICARE.

## What is ILUMYA?

ILUMYA® (tildrakizumab-asmn) is a prescription medicine used to treat adults with moderate to severe plaque psoriasis who may benefit from taking injections, pills (systemic therapy), or phototherapy (treatment using ultraviolet or UV light).

## IMPORTANT SAFETY INFORMATION

What is the most important information I should know about ILUMYA?

Do not use ILUMYA if you have had a severe allergic reaction to ILUMYA or any of its ingredients.

Get emergency medical help right away if you get any of the following symptoms of a serious allergic reaction:

- feel faint
- trouble breathing or throat tightness
- swelling of your face, eyelids, lips, mouth, tongue or throat
- chest tightness
- skin rash

ILUMYA is a medicine that may lower the ability of your immune system to fight infections and may increase your risk of infections. Your healthcare provider should check you for infections and tuberculosis (TB) before starting treatment with ILUMYA and may treat you for TB before you begin treatment with ILUMYA if you have a history of TB or have active TB. Your healthcare provider should watch you closely for signs and symptoms of TB during and after treatment with ILUMYA.

Tell your healthcare provider right away if you have an infection or have symptoms of an infection, including:

- fever, sweats, or chills
- muscle aches
- weight loss
- cough
- warm, red, or painful skin or sores on your body different from your psoriasis
- diarrhea or stomach pain
- shortness of breath
- burning when you urinate or urinating more often than normal
- blood in your phlegm (mucus)

Before receiving ILUMYA, tell your healthcare provider about all of your medical conditions, including if you:

- have any of the conditions or symptoms listed in the section "What is the most important information I should know about ILUMYA?"
- have an infection that does not go away or that keeps coming back
- have TB or have been in close contact with someone with TB
- recently received or are scheduled to receive a vaccine (immunization). You should avoid receiving live vaccines during treatment with ILUMYA.
- are pregnant or plan to become pregnant. It is not known if ILUMYA can harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if ILUMYA passes into your breast milk.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

It is not known if ILUMYA is safe and effective in children under 18 years of age.

What are the possible side effects of ILUMYA?

ILUMYA may cause serious side effects. See "What is the most important information I should know about ILUMYA?"

The most common side effects of ILUMYA include upper respiratory infections, injection site reactions and diarrhea. These are not all of the possible side effects of ILUMYA. Call your doctor for medical advice about side effects.

You are encouraged to report any negative side effects of ILUMYA to FDA. Visit [www.fda.gov/medwatch](https://www.fda.gov/medwatch) or call 1-800-FDA-1088. You are also encouraged to report side effects or ADEs (adverse drug events) to our Drug Safety Department at 1-800-406-7984 or [drug.safetyUSA@sunpharma.com](mailto:drug.safetyUSA@sunpharma.com) (preferred) with as much information as available.

Please read the full [Prescribing Information](#) and [Medication Guide](#) for ILUMYA and discuss any questions with your doctor.
